Profile

Frontend developer with a focus on usability, clean code and performance.

I have worked most with **React** (hooks, context, redux etc.)

I use **TypeScript** whenever possible, and aim for high **unit test** coverage.

Skills & Tools

- Modern JavaScript, TypeScript, unit testing (Jest)
- REST and GraphQL APIs
- Responsive layouts, grid, flexbox, CSS-in-JS, Tailwind etc.
- Accessibility and SEO best practices
- Design collaboration tools (Figma, Zeplin), Agile, Scrum

I've worked with some other tools and tech as well — please ask if you think something is missing!

Experience

Senior Frontend Developer, PPAYA

April 2021 – currently, remote

- Built an energy tendering dashboard from scratch (React, GraphQL)
- Responsible for website development and design (based on brand guidelines)
- Participated in hiring process

Frontend Developer, Freelance

October 2020 – March 2021, remote

Full website build for a vintage poster store, using Gatsby + Shopify API.

Frontend Developer, Fidel API

January 2018 – October 2020, London/remote

- Responsible for full website development
- Worked on migration of a complex dashboard from Angular to React
- Ported secure JS SDK from a vanilla JS file to a fully tested React code base
- Created unit testing culture that led from 0 to 98%+ coverage under 6mo
- Introduced quarterly 'Clean Code Weeks'.

Full-stack Engineer, Prezi

November 2016 – December 2017, Budapest

Worked on the web editor and online Prezi viewer, including cross-browser parity. Participated in workgroup migrating acceptance tests to Cucumber.

Previously

Bid Manager, IBM, 2014–2016
Customer Logistics Planner, Bosch, 2012–2014

Education

International Business BA, University of Pannonia, 2012
